

DNZ tiles

Art in every tile

DNZtiles is a ceramic wall tile brand that brings together the character of craftsmanship with the discipline of modern production. Shaped through the dry pressing technique, the tiles carry the subtle traces of handcraft in their refined surface details. Because a surface is not merely a boundary; it is a field of expression.

The technique may be modern, yet the memory of the hand is always present. The precision of engineering and the warmth of craft unite in a perfectly balanced architectural harmony. By simply rotating the tiles, the geometric pattern is completely transformed, and the rhythm of the wall evolves with the play of light and shadow. The user does not merely choose a surface; by changing the orientation, they compose their own unique arrangement.

Deniz Pekin

Founder & Creative Director

Where Engineering Meets Art

Deniz Pekin is an M.Sc. Civil Engineer (YTU), ceramic artist, designer, and project management professional with more than twenty years of experience in the construction and architecture sector.

Throughout her career, she has led complex architectural and construction projects, developing a strong expertise in structure, systems, and spatial thinking. The discipline and precision of engineering continue to shape her design philosophy.

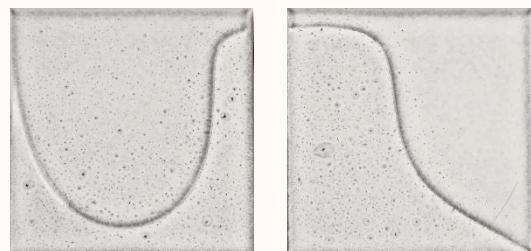

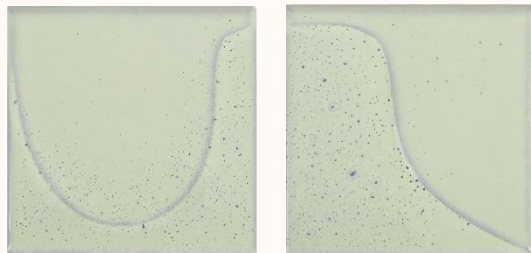

Alongside her professional career, Pekin has developed an independent ceramic and surface design practice, exploring the relationship between material, light, and form. Her works have been exhibited in national art exhibitions and featured in interior design and lifestyle publications.

Through her multidisciplinary background, she brings together engineering discipline and artistic expression, creating a distinctive approach to contemporary surface design.

Color Palette

From Vision to Living Spaces...

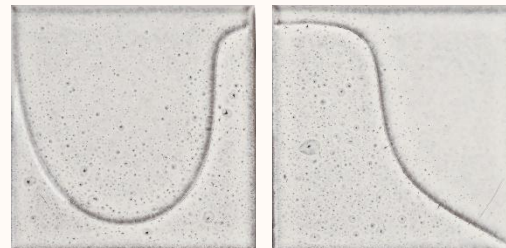

Crafted from natural clay and finished with a vibrant palette of glazes. Utilizing the dry-pressing technique, each tile maintains its structural precision while preserving a textured surface that radiates authentic charm and individual character.

Ideal for artistic wall installations.

Fluid.

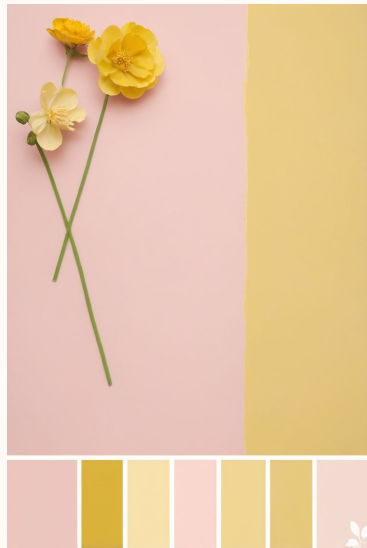

Rhythmic.

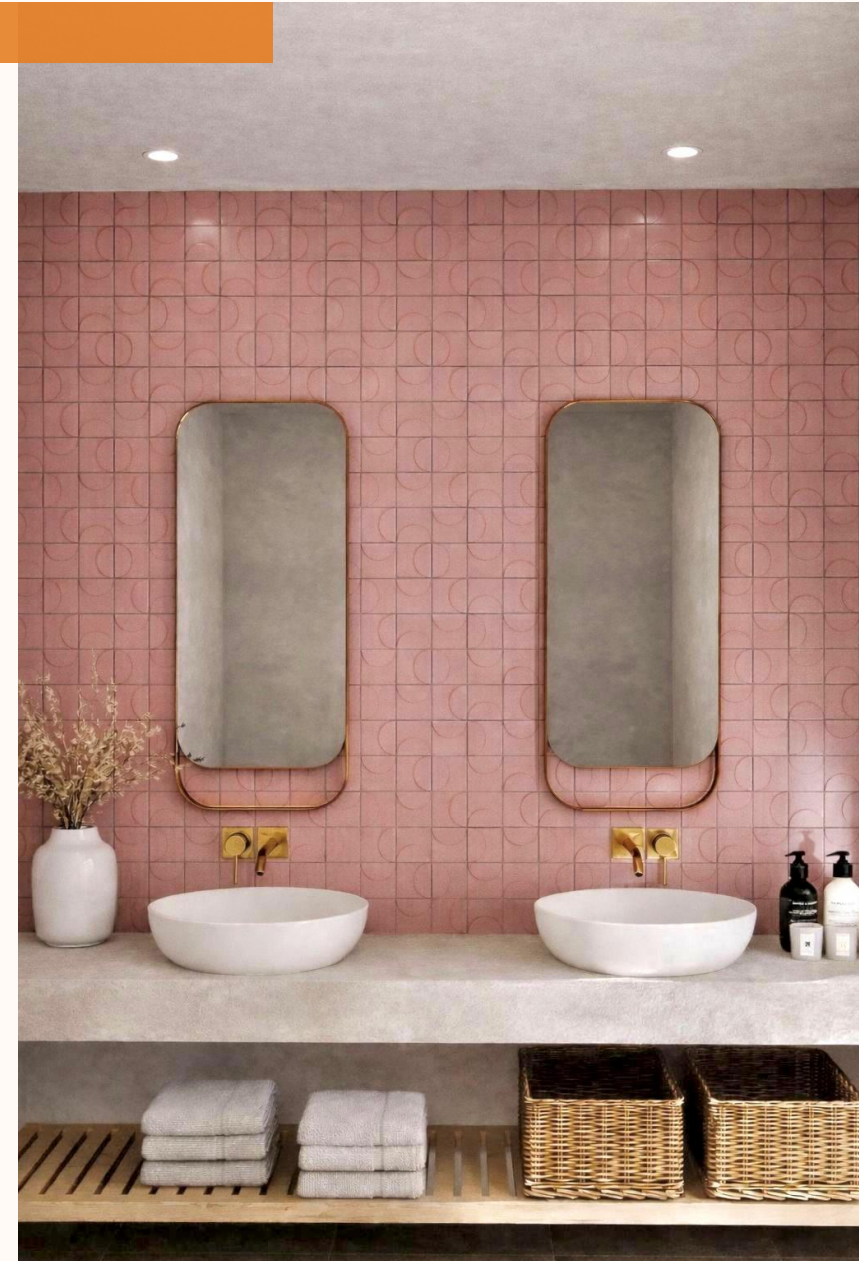

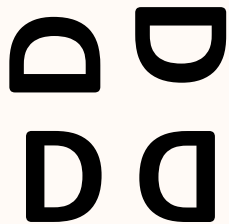

Modular. Graphic. Dynamic.

Endless combinations like Lego logic.

Designed for interactive surface compositions.
Pattern changes when rotated.

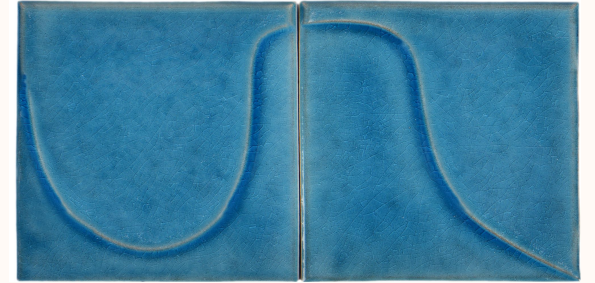

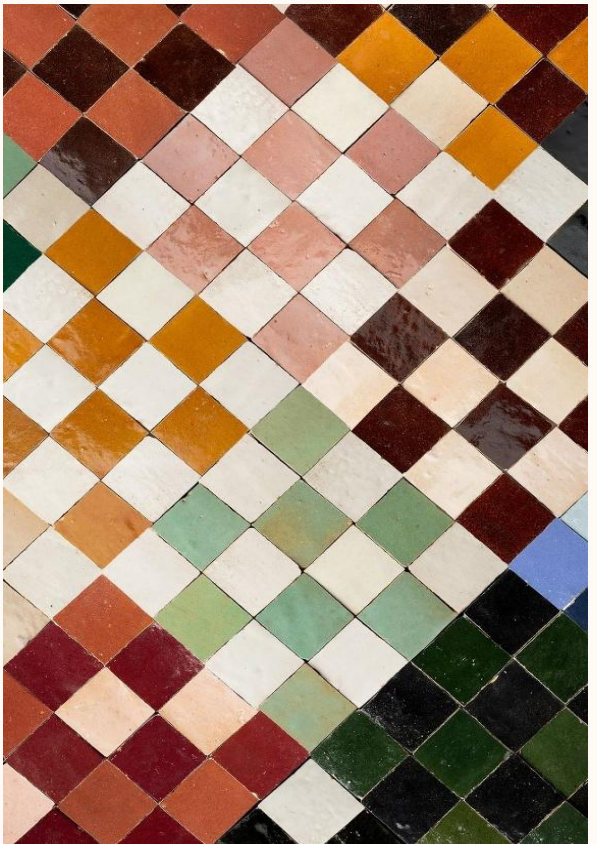

DNZ Tiles redefines the ceramic surface as a modular field of expression. Through the signature 'D' and 'Wave' models, our system invites you to become the composer of your own space. These rotatable patterns allow for endless compositions, where light dances across relief textures and every shadow adds a new layer of depth to the interior

Inspired by water and movement, the Wave model creates a sense of continuous motion across surfaces. It transforms every interior into a unique field of artistic expression.

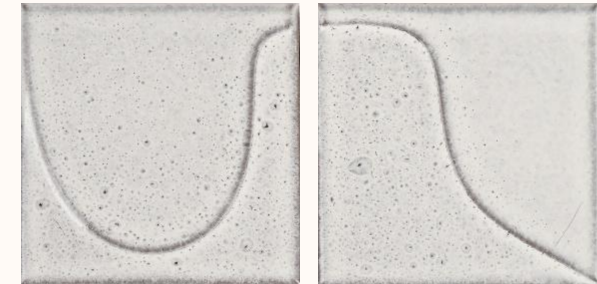

Timeless complementary surfaces.
Pattern changes when rotated.

Where color becomes emotion. A vibrant palette designed to define the soul of a space. Beyond mere shades, our glazes are curated to evoke feeling, turning every surface into a personal statement of style and character...

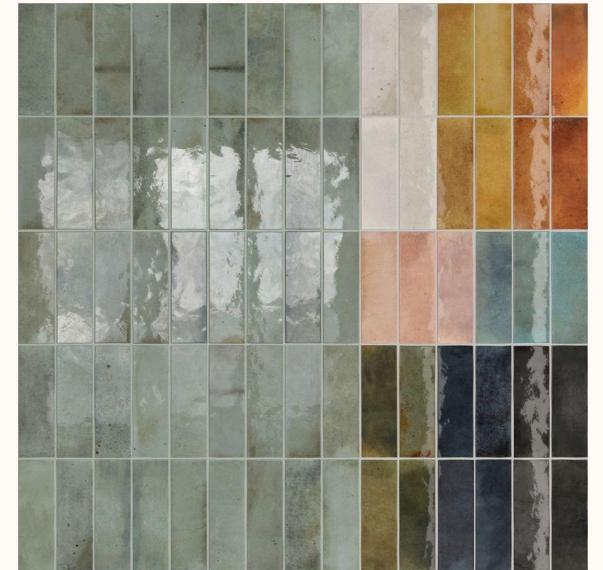

Minimalist architectural surfaces. Where simplicity meets the rhythm of the waves. Designed for spaces where form and light prevail over clutter, these surfaces create a calm yet captivating atmosphere.

Bold expressions in ceramic art. Transform your walls and floors into a canvas of color, where sophisticated glazes meet refined textures.

Thank you for being part of our journey...
